INTRODUCTION

Genios Club Community started in December 2022 with a capitalization system created with smart contract technology, this system was created in the Binance Smart Chain environment using the BUSD BEP20 stable coin. Issues related to this crypto asset led the community to migrate to the Polygon Network using on that time the DAI stable coin and successfully growing the community to a count of over 14 thousand members in less than 14 months, creating in the process one of the best growth stories in our industry.

Our guiding principle has always been sustainability, something we have achieved so far by insuring our systems operate in a decentralized manner in order to give our members the peace of mind it needs.

In this new stage, our community aims at developing systems that allow our people to create and support capitalization opportunities both in the digital space and in the traditional (physical) market by using GENIUS PEOPLE token to facilitate these transactions.

One of the most important goals is to participate in the tokenization of illiquid assets that allow our community to have access to capital gains while engaging in some of the lowest risk endeavors in the crypto space.
